IMPLICATIONS ON SECURITY DURING AND AFTER COVID19

FEDIL, The Voice of the Luxembourg's Industry, in collaboration with the Ministry of the Economy (Department of the e-commerce and Information Security) launched a Forum on Cybersecurity dedicated to the manufacturing industry (IND).

This forum follows the principles of an « Information Sharing and Analysis Center » (ISAC).

The IND-ISAC mission is to promote the cooperation in terms of cybersecurity within the manufacturing industry sector in Luxembourg and the Greater Region for the benefit of the attractiveness of the ecosystem.

This Forum enables companies' cybersecurity representatives to share information, experience, knowledge and best practices among peers in a climate of trust. The aim is to identify sector-specific risk scenarios, vulnerabilities and threats to provide companies with concrete guidance on how to conduct a risk management analysis.

The IND-ISAC is composed of companies' cybersecurity representatives from several industries.

The following document, available in English, French and German, is the first outcome of the IND-ISAC and focuses on the COVID-19 crisis.
